Harshith K V

Aspiring .NET / C# Developer

mailto:kvharshith6557@gmail.com| +91 79755 85507 | LinkedIn | GitHub | Mysuru, KA

PROFESSIONAL SUMMARY

Computer Science graduate (CGPA 8.75) actively building expertise in C#, ASP.NET Core, and the .NET ecosystem through hands-on project development. Strong foundation in OOP, REST API design, SQL Server, and Entity Framework Core. Experienced in Python-based ML/IoT systems with a proven ability to learn new frameworks rapidly. Seeking a fresher .NET Developer role to contribute clean, maintainable code on production-grade applications.

TECHNICAL SKILLS

.NET / C#	C#, ASP.NET Core MVC, ASP.NET Core Web API, Entity Framework Core, .NET 8
Web & UI	Razor Pages, HTML5, CSS, JavaScript, React (In Progress)
Databases	MySQL, MongoDB, SSMS
Tools & Platforms	Visual Studio 2022, VS Code, Git & GitHub, Postman, Swagger
Programming	C#, Python, Java,
Other	REST API, JWT Authentication, MVC Architecture, Agile/Scrum

PROJECTS

Employee Management System | **ASP.NET Core MVC + SQL Server** | *2024 – Present*

- Built a full-stack CRUD web app using ASP.NET Core MVC 8 and Entity Framework Core, managing 500+ employee records with role-based access control.
- Implemented Repository Pattern and Dependency Injection, reducing code duplication by ~40% and improving unit-test coverage to 80%.
- Designed 8 normalized SQL Server tables with stored procedures and LINQ queries, cutting average query time by 30%.
- Tech: C#, ASP.NET Core 8 MVC, Entity Framework Core, SQL Server, Bootstrap 5, Git

RESTful API — Product Catalogue Service | **ASP.NET Core Web API** | *2024*

- Designed and built a RESTful Web API with 15+ endpoints following Swagger spec, enabling seamless front-end integration.
- Integrated JWT Bearer authentication and role-based authorization, securing 100% of sensitive endpoints.
- Applied async/await patterns throughout, improving throughput under concurrent load by ~50% in local benchmarks.
- Tech: C#, ASP.NET Core Web API, JWT, Swagger, SQL Server, Postman, GitHub

Fire Safety IoT System | **Python · Flask · YOLO · Flutter** | *2023 – 2024*

- Led end-to-end development of an IoT fire-detection system: trained a custom YOLO classifier on 1,200+ labelled images achieving 91% detection accuracy.
- Built a Flask REST API backend handling concurrent sensor-data streams; integrated cloud alert pipeline with <2 s latency.
- Delivered a Flutter mobile app for real-time hazard alerts — direct experience with REST API consumption transferable to .NET API clients.
- Tech: Python 3.12, MongoDB, Flutter 3.35, ESP-32

Real Estate Price Prediction ML Model | **Python · Scikit-Learn** | *2023*

- Engineered 12 features from raw property data; trained and tuned a regression model achieving $R^2 = 0.87$ on the test set.
- Deployed model behind a Flask REST endpoint — reinforced REST architecture knowledge applicable to ASP.NET Core Web API.
- Tech: Python 3.10, Scikit-Learn

EDUCATION

B.E. in Computer Science — CGPA: 8.75 / 10 | **ATME College of Engineering, Mysuru** | *2022 – Present*

- Relevant coursework: OOP with C#, DBMS, Data Structures & Algorithms, Computer Networks, Software Engineering

CERTIFICATIONS & LEARNING

- Python for Data Science — NPTEL (2024)
- Programming in Java — NPTEL (2024)
- Microsoft Learn: C# Fundamentals & ASP.NET Core (In Progress)
